FOREWORD

The 2005 edition of the *North Carolina Pesticide Report* represents a revision of previous issues. By elaborating on the purpose of this report, by adding new material, and by better defining the substances listed, we attempted to reflect in a more meaningful manner, the information collected during the 2005 calendar year. We hope that more readers will be able to use it effectively.

This will acknowledge and express our appreciation to the following people who made significant contributions to the contents and preparation of this Pesticide Report:

Pesticide Section - Betty H. Griffin, Deborah Barbour, Effie Carroll, Shannon Joyner, Nivia Tillman, and Shamika Wilkins, *Processing Assistant III*'s; Margaret D. Broome, Amy D. Barrette, and Karen Hunt, *Office Assistant IV*'s; Stacey R. Hicks and Laura L. Stover, *Processing Assistant IV*'s; Jamie Frye, *Administrative Secretary II*; Michael V. Williams and Jan L. Culbreth, *Information Processing Technicians*; Florence S. Lamphier, *Administrative Officer I*; James W. Burnette, Jr., *Pesticide Administrator*; Sharron A. Stewart, *Deputy Pesticide Administrator*; L. Lee Davis, *Registration Manager*; Kay G. Harris, *Certification, Licensing & Outreach Manager*; J. Patrick Jones, *Field Operations & Regulatory Manager*; Dr. Henry F. Wade, *Environmental Quality Manager*; Carmina C. Hanson, *Bilingual Pesticide Specialist*; Michael A. Mitchell, *Pesticide Operations Specialist*, William G. Parham, III, Carolyn M. Thompson, Judy Card, Jagathi Kamalakanthan, and J. Cam McDonald, *Pesticide Specialists*; James H. Choate and S. Renee Woody, *Certification Specialists*; John B. Dalley and Dwight E. Seal, *District Managers*; James C. Bristow, Jr., Charles L. Clark, Steven F. Gatton, Benny C. Griffin, N. Patrick Farquahar, Gwen T. Minton, Forrest Sue Egelston-Moncada, and Paul H. Ward, III, *Pesticide Inspector II*'s; Thomas C. Bowman, Jr., W. Kenneth Crabtree, M. Timm Dazey, Jr., W. How to Use This Report

The N.C. Pesticide Board is mandated by the General Statutes of North Carolina (§ 143-437) to make annual reports to the Governor on matters involving pesticides. The *North Carolina Pesticide Report for 2005* fulfills this mandate. Considerable time and effort have gone into editing and organizing this 2005 edition which summarizes regulatory activities performed under the N.C. Pesticide Law of 1971. Every section has been updated, and new information has been added in order to make the *North Carolina Pesticide Report for 2005* a useful reference. In this document you will find the following:

Introduction

The Introduction describes the development of laws and regulations governing the sale and use of pesticides in North Carolina. It also refers to certain divisions in the North Carolina Department of Agriculture & Consumer Services that perform key roles in regulating and controlling the sale and use of pesticides in this State.

North Carolina Pesticide Law of 1971 and Adopted Regulations

This section presents a brief abstract of the North Carolina Pesticide Law of 1971. It also indicates where to obtain a complete copy of the Law and the pursuant Regulations adopted by the North Carolina Pesticide Board.

Pesticide Board and Pesticide Advisory Committee

This section presents a brief description of the duties and composition of the North Carolina Pesticide Board and the North Carolina Pesticide Advisory Committee. In addition, a brief summary of each North Carolina Pesticide Board meeting held during 2005 is given.

Pesticide Environmental Trust Fund

In this section, a summary of the Pesticide Environmental Trust Fund's financial transactions for 2005 is presented. Balances, receipts, expenditures, refunds, cumulative (1993-2005) figures and project summaries are given.

Pesticide Container Recycling and Disposal Assistance Programs

This section summarizes the amount of plastic pesticide containers recycled during 2005 and the amount of pesticides waste collected at both the designated disposal collection sites and permanent household hazardous waste collection sites across North Carolina during the same year.

Licensed Pesticide Dealers, 2005

This section is a directory of the names and counties of pesticide dealers licensed in 2005.

Licensed Pesticide Aerial Applicators, 2005

This section is a directory of the names and counties of aerial pesticide applicators licensed in 2005.

Licensed Pesticide Ground Applicators, 2005

This section is a directory of the names and counties of ground pesticide applicators licensed in 2005.

Licensed Pesticide Public Operators, 2005

This section is a directory of the names and counties of public operators licensed in 2005 to apply pesticides for municipal, county, state, and/or federal governments.

Licensed Pest Control Consultants, 2005

This section is a directory of the names and counties of pest control consultants licensed in 2005.

NOTE. *Individually requested and tailored lists of registrants, dealers, applicators or consultants are available by contacting the Pesticide Section at (919) 733-3556. A nominal printing charge may apply.*

Definitions Adopted

This section explains definitions that were adopted for reporting the analytical results of pesticides sampled by pesticide inspectors and analyzed by the Department's laboratories.

Table I

Table I gives the analytical results of pesticides sampled and analyzed for their formulations. Company name and address are those listed on the product label when it was purchased in the marketplace.

Table II

Table II presents the results of disinfectants tested for their label guarantee to kill various microorganisms. Here again, company name and address are those listed on the product label when it was purchased in the marketplace.

Table III

Table III is an alphabetical listing of the names and addresses of manufacturers and/or distributors that were found to have unregistered or misbranded products in the marketplace during 2005.

Summary of Regulatory Activities Performed

This section presents a summary of the various regulatory activities performed by the Department under the North Carolina Pesticide Law of 1971. The following information is included: number of manufacturers who registered pesticides for sale; number of pesticide products registered; number of physical samples collected and examined; number of stop-sale, stop-use, or removal orders issued; the number of licenses and private applicator certificates issued; and the number of compliance inspections conducted.

Introduction

The term "Pesticide" covers a large number of materials and mixtures intended for destroying, controlling, or repelling pests such as insects, weeds, and other noxious plants, predatory animals and birds, soil-infesting pests such as nematodes, algae, snails, and bacteria. Other examples are disinfectants, antiseptics, and fungicides for use other than on living man or other animals, defoliants, various repellents, fly paper, and other adhesive products whose action goes beyond simple mechanics, moth proofers, wood preservatives other than common paints, mildew controls, and seed fumigants.

An adequate and readily available supply of many of these products is essential in the economical production of feed and fiber crops. The preservation of many products in storage and the control of domestic and industrial pests which affect both the health and welfare of human beings and animals are like-wise dependent on such materials.

While the development and distribution of various pesticides to serve the needs are important, provisions must be present to protect the public. During the years 1947 through 1971, it was the purpose of the economic poisons law (North Carolina Insecticide, Fungicide, and Rodenticide Act of 1947, G.S. 4A, Chapter 106) to protect the public from adulterated, misbranded, worthless, and dangerous products, and legitimate manufacturers from unscrupulous competition.

During the years 1953 through 1971, the aerial application of pesticides was regulated by the North Carolina Aerial Crop Dusting Law, G.S. 4B, Chapter 106. The Law and the regulations promulgated thereunder, in summary, required the registration and licensing of contractors and aviators who engaged in the custom application of pesticides by aircraft in North Carolina. The validity of a license was further restricted to the period of time that coverage by liability bond or insurance for damage by aircraft was in force.

During 1969, the North Carolina General Assembly through House Resolution 1392 directed the Legislative Research Commission to study the laws regulating pesticides in N.C. and report its findings and recommendations to the 1971 General Assembly. As a result of the findings and recommendations of the Commission, the North Carolina Pesticide Law of 1971 was adopted. The N.C. Pesticide Law of 1971 established the North Carolina Pesticide Board as the governing body for the programs of pesticide management and control set forth in the Law. Provisions for regulating the use, application (aerial and ground), sale, storage, disposal and registration of pesticides are set forth in the Law.

The Law provides for the adoption of a list of restricted use pesticides and requires the licensing of all pesticide dealers who sell restricted use pesticides directly to users. Pesticide applicators and consultants are also subject to licensing requirements. Private pesticide applicators may be required to be certified or recertified in order to purchase, use, and supervise use of restricted use pesticides in agricultural commodity production.

The Commissioner of Agriculture is responsible for administering and enforcing the Law and all rules and regulations adopted by the Board.

Each brand or grade of pesticide must be registered with the North Carolina Department of Agriculture & Consumer Services before it can be legally offered for sale in the State. A \$30.00 registration fee for each brand or grade must accompany each application for registration. In addition to the registration fee, an annual environmental assessment must be paid for each brand or grade to be registered in North Carolina. The assessment shall be \$50.00 if the applicant's gross sales of the pesticide in this state for the preceding 12 months for the period ending September 30th were more than \$5,000.00 and \$25.00 if gross sales were less than \$5,000.00. This assessment must accompany the \$30.00 registration fee in order for the registration to be complete.

A statewide inspection service will be maintained to investigate incidents involving pesticide misuse and to implement programs to enhance compliance to the Law and regulations. In addition to product registration and applicator licensing programs, the Pesticide Section of the Food and Drug Protection Division will implement programs as authorized by regulation pertaining to the quality of formulated pesticides, the storage, disposal, and use of pesticides. The Department will maintain analytical laboratories to conduct analysis of official samples obtained for regulatory purposes.

Brief of the North Carolina Pesticide Law of 1971

North Carolina Pesticide Board

Governing Body

Commissioner of Agriculture

Administrative
and Enforcement

North Carolina Pesticide Advisory Committee

Assists the Board and
Commissioner in an
advisory capacity

Any pesticide may be designated as a "Restricted Use Pesticide" upon the grounds that in the judgment of the Board it is so hazardous or injurious to persons, pollinating insects, animals, crops, wildlife, lands, or the environment that additional restrictions on its sale, purpose, use, or possession are required. Restricted Use Pesticides also include any pesticide required by the Environmental Protection Agency to bear the designation on its labeling "Restricted Use Pesticide." (Restricted Use Pesticides have been established by regulation.)

The Board may require certification and recertification of private pesticide applicators and charge a fee of up to \$10.00. The current fee is established by regulation at \$6 for a three-year certification.

All pesticide dealers who sell restricted use pesticides must be licensed. Application for a pesticide dealer's license must be accompanied by a nonrefundable fee of \$30. All licenses shall expire on December 31 of the year for which they are issued. The license may be renewed annually upon application to the Department of Agriculture and Consumer Services, accompanied by a non-refundable fee of \$30 for each license. Each applicant must demonstrate upon written, or written and oral, examination his knowledge of pesticides, their usefulness and their hazards; his competence as a pesticide dealer; and his knowledge of the laws and regulations governing the use and sale of pesticides.

No person shall engage in the business of pesticide applicator within North Carolina unless he is licensed annually by the Board. Each license application shall be accompanied by a nonrefundable fee of \$30 for each applicator's license and an additional \$10 for each aircraft to be licensed. A pesticide applicator is defined as any person who owns or operates a pesticide application business or who provides, for compensation, a service that includes the application of pesticides upon the lands or properties of another; any public operator; any golf course operator; any seed treater; any person engaged in demonstration or research pest control; and any other person who applies pesticides for compensation and is not exempt from this definition. It does not include:

- a. Any person who uses or supervises the use of a pesticide (i) only for the purpose of producing an agricultural commodity on property owned or rented by him or his employer, or (ii) only (if applied without compensation other than trading of personal services between producers of agricultural commodities) on the property of another person, or (iii) only for the purposes set forth in (i) and (ii) above.
- b. Any person who applies pesticides for structural pest control, as defined in the North Carolina Structural Pest Control Law (G.S. Chapter 106, Article 4C.)

Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide applicator or public operator. In addition, to be licensed as a pilot, a person must have 125 hours and one year's flying experience as a pilot in the field of aerial pesticide application.

No person shall perform services as a pest control consultant without first procuring from the Board a license. The application for a license shall be accompanied by an annual nonrefundable fee of \$30. A pest control consultant is defined as any person who, for a fee, offers or supplies technical advice, supervision, or aid, or recommends the use of specific pesticides for the purpose of controlling insects, plant diseases, weeds, and other pests, but does not include any person regulated by the North Carolina Structural Pest Control Act. Each applicant must demonstrate upon written, or written and oral, examination his competence as a pesticide consultant. An applicant for a pest control consultant license must possess a Ph.D., master's, or bachelor's degree in an agricultural or biological science from an accredited college or university with a minimum of 30 semester hours or 45 quarter hours of credit in subject areas pertinent to the category in which the applicant seeks to obtain a license. Emphasis of study must include insect, plant, bacterial, and fungal pests, as applicable to the category, and integrated pest management.

No person shall handle, transport, store, display, or distribute pesticides in such a

manner as to endanger man or his environment.

Every pesticide prior to being distributed, sold, or offered for sale within this State or delivered for transportation or transported in intrastate commerce or between points within this State through any point outside this State, shall be registered and such registration shall be renewed annually. Each manufacturer, distributor, or registrant of a pesticide shall supervise the activities of any employee or agent to prevent the making of deceptive or misleading statements about a pesticide. It shall be unlawful for any person to distribute, sell, or offer for sale any restricted use pesticide to any dealer who does not hold a valid N.C. Pesticide Dealer License.

A registration fee of \$30 for each brand or grade of pesticide is required. An additional \$200 delinquent registration penalty shall be assessed against the registrant for each brand or grade of pesticide marketed in North Carolina prior to registration.

An annual Pesticide Environmental Trust Fund assessment fee is required for each brand or grade of pesticide registered. This fee is either \$25.00 or \$50.00, based on gross sales of the pesticide within the State for the previous year. The assessments provide funding for agromedicine efforts at East Carolina University, North Carolina State University, and North Carolina A&T University and for pesticide environmental programs administered by the N.C. Department of Agriculture & Consumer Services.

Registration is subject to refusal or cancellation for cause and upon hearing.

Any brand or grade found to be deficient or excessive in active ingredients, misbranded, adulterated, or not registered is subject to "Stop Sale, Stop Use or Removal Orders."

The Pesticide Board may assess a civil penalty of not more than \$2,000 against any person who violates or directly causes a violation of any provision of this Article or any rule adopted pursuant to this Article. In determining the amount of any penalty, the Board may consider the degree and extent of harm caused by the violation and the cost of rectifying the damage caused by the violation.

Notwithstanding any other provision of this Law, the maximum penalty which may be assessed under this section against a "private pesticide applicator" is \$500 and such penalties may be assessed only for willful violations.

Any person who shall be adjudged to have violated any provision of the Law, or any regulation of the Board adopted pursuant to this Law, shall be guilty of a Class 2 misdemeanor and for each violation shall be liable for a penalty of not less than \$100 or more than \$1,000 or shall be imprisoned for not more than 60 days, or both. In addition, if any person continues to violate or further violates any provision of this Article after written notice from the Board, the court may determine that each day during which the violation continued or is repeated constitutes a separate violation subject to the foregoing penalties.

North Carolina Pesticide Board

The North Carolina Pesticide Board is a seven-member, governor appointed Board charged with the duty of governing pesticide management and control as set forth in the North Carolina Pesticide Law of 1971. The members represent different sectors of the regulated public.

The Board adopts rules and regulations and makes policies for the program outlined in the North Carolina Pesticide Law of 1971. Board members serve staggered four-year terms. Appointments to fill vacancies in the Board are of individuals having the same credentials as the predecessor.

MEMBERS OF THE NORTH CAROLINA PESTICIDE BOARD, 2005

(N.C. General Statute §143-436)

One member each representing the North Carolina Department of Agriculture and Consumer Services; the North Carolina Department of Environment and Natural Resources; and the State Health Director or his designee. The persons so selected may be either members of a policy board or departmental officials or employees.

Mr. Carl E. Falco, Director, Structural Pest Control Division,
N. C. Department of Agriculture and Consumer Services, P. O. Box 27647, Raleigh, NC 27611
(Tel. 919/733-6100 office)

Dr. Ricky L. Langley, Medical Epidemiologist, Occupational and Environmental Epidemiology Section,
N. C. Department of Health and Human Services, 1912 Mail Service Center, Raleigh, NC 27699-1912
(Tel. 919/715-6428 office)

Ms. Robin W. Smith, Assistant Secretary for Planning and Policy,
N.C. Dept. of Environment and Natural Resources, 1601 Mail Service Center, Raleigh, NC 27699-1601
(Tel. 919/715-4141)

A representative of the agricultural chemical industry.

Dr. Thomas Allen Scarborough,
7905 Farnham Ct., Raleigh, NC 27616
(Telephone: 919/676-4113 work)

A person directly engaged in agricultural production.

* **Mr. M. Scott Whitford**,
1903 Scott's Store Road, Grantsboro, NC 28529
(Tel. 252/745-5612 home)

Two at-large members, from other fields of endeavor, one of whom shall be a nongovernmental conservationist.

** **Mr. Charles L. Keels**,
1021 Tanglewood Drive, Cary, NC 27511
(Tel. 919/467-8525 home)

Dr. W. Benson Kirkman,
3712 Eakley Court, Raleigh, NC 27606
(Tel. 919/859-1187 home)

North Carolina Pesticide Board Meetings

January 11, 2005

Assistant Attorney General Barry Bloch presented settlement agreements for the Board's consideration and approval.

March 8, 2005

Dr. Ray Long, Crop Science Department, NCSU presented a PETF Year-End Progress Report and Funding Request for the **Precision Application of Reduced Volumes of Agrochemicals**. Dr. Long gave a brief update on how his project has progressed and requested an additional \$5,750.00 from the Board. Dr. Long informed the Board that they would be bringing this project to a close this year.

Assistant Attorney General Barry Bloch presented settlement agreements for the Board's consideration and approval.

May 10, 2005

Sheila Higgins, RN MPH, DHHS Occupational Health Surveillance Unit, presented a **Pesticide Surveillance Grant Proposal**. Ms. Higgins presented a brief overview of the proposal, including goals and benefits to the Public and Industry.

A MEMORANDUM OF AGREEMENT between the North Carolina Pesticide Board (Cooperator) and the U.S. Department of Agriculture, Animal and Plant Health Inspection Service Plant Protection and Quarantine (APHIS) was presented by Mr. James Choate.

Dr. John Van Duyn presented a proposal for PETF funding for "**Managing Western Corn Rootworm Damage and Reducing Pesticide Risks in Piedmont Silage Corn Production**" to the Board for consideration.

Ms. Shauna Ortiz, SAFE-NC Program Coordinator, NC Farmworker Health Program presented a request for additional funding for WPS trainers through Americorps. The funding will be used to train additional trainers.

A PETF funding request was presented by Dr. Wayne Buhler for printing copies of the "**Recordkeeping Manual for North Carolina Private Pesticide Applicators**".

A proposal for PETF funding was presented to the Board on behalf of the Pesticide Section by Ms. Kay Harris, Licensing, Certification and Outreach Manager and Mr. Michael V. Williams, Information Processing Technician, for the purchase and implementation of hand held bar code scanners as part of the **Bar Code Scanning Program** instituted by the Pesticide Section to enhance data management required by the Licensing and Recertification Programs.

Dr. Henry Wade, Environmental Programs Manager with the NCDA&CS Pesticide Section, presented the **2005 PETF Plastic Pesticide Container Recycling Program** proposal to the Board.

Ms. Sharron Stewart, Deputy Pesticide Administrator NCDA&CS, presented the Board with the **2004 PETF Annual Financial Report**.

Assistant Attorney General Barry Bloch presented settlement agreements for the Board's consideration and approval.

August 9, 2005

Assistant Attorney General Tom Meacham presented settlement agreements for the Board's consideration and approval.

Board member, Dr. W. Benson Kirkman filed an "**Evaluation of Statement of Economic Interest**" from the N.C. Board of Ethics. Mr. Jim Burnette read the statement into the minutes as requested by the Board of Ethics.

A request for additional funding for the **Plastic Pesticide Container Recycling Program for 2005** was presented by Dr. Henry Wade, Environmental Programs Manager, NCDA&CS Pesticide Section.

Mr. R.B. Goforth requested the Board to consider a more effective means of controlling moles in NC and that the Board take action to allow the use of chemicals as a means of control.

Mr. Goforth also asked the Board to consider implementing a requirement for pesticide applicators to post either their pesticide license or company name on their service vehicles.

Comments were presented by Ms. Kay Wynn concerning Restricted Use Pesticide sales reporting, record keeping of RUP sales, and container management needs. Ms. Wynn asked the Board to consider tightening regulations on how RUPs are transported.

NC Pesticide Board member Dr. Ricky L. Langley inquired about the status of PETF funds. Mr. Jim Burnette advised the Board that the General Assembly did amend the NC Pesticide Law to require that funding for the Department's Public Assistance Pesticide Disposal Program be taken out of the PETF Collections.

November 8, 2005

Mr. Burnette introduced Mr. Joe Reardon, newly appointed Director, Food and Drug Protection Division and Ms Audrey Pilkington, new Compliance Assurance Officer, Food and Drug Protection Division to the Board members.

Mr. Derrick Bell and Mr. Royce Batts, Food and Drug Protection Division presented the **PETF Final Report: "The Integration of Pesticide Disposal Assistance and Pesticide Container Recycling - Mini-Bulk Recycling and Storage Buildings."**

A consideration for approval for the **Private Pesticide Applicator Recertification Program Curriculum: 2006-2008** was presented by Dr. Wayne Buhler, NCSU.

An update on the **Pesticide Applicator Vehicle Placarding Consideration** was presented by Ms. Renee Woody, Certification Specialist, NCDA&CS Pesticide Section.

Assistant Attorney General Tom Meacham presented settlement agreements for the Board's consideration and approval.

The North Carolina Pesticide Advisory Committee

The North Carolina Pesticide Law of 1971 establishes a twenty-member Pesticide Advisory Committee to advise the N.C. Pesticide Board on technical questions and on the development of rules and regulations. Members of the Advisory Committee represent different sectors of the regulated public. Members of the Committee serve at the pleasure of the Board.

MEMBERS OF THE N.C. PESTICIDE ADVISORY COMMITTEE, 2005

(N.C. General Statute §143-439)

Three practicing farmers

****Mr. Dan McConnell**, 475 Old Dana Road, Hendersonville, NC 28792
(Tel. 828/692-2819)

****Mr. Marshall W. Grant**, Route 1, Box 66, Garysburg, NC 27831
(Tel. 919/537-5111 home)

****Mr. Darryl K. Corriher**, 1475 Corriher Springs Road, China Grove, NC 28023
(Tel. 704/857-6557 home)

One conservationist (at large)

****Mr. John Paul Lilly**, 312 Hampton Drive, Plymouth, NC 27962
(Tel. 252/793-2088 home)

One ecologist (at large)

****Dr. Thomas R. Wentworth**, Professor, Dept. of Botany, NCSU, Box 7612, Raleigh, NC 27695-7612
(Tel. 919/515-2168 office)

One representative of the pesticide industry

****Dr. Stewart Sherrick**, 4774 River Farm Road, Rocky Mount, NC 27803
(Tel. 919/338-8024 home)

One representative of agri-business (at large)

****Mr. Charles G. Rock**, 5517 Robin Ridge Road, Greensboro, NC 27410
(Tel. 336/294-4238 home)

One local health director

****Ms. Jenny P. Lassiter**, Health Director, Pamlico Co. Health Dept., PO Box 306, Bayboro, NC 28515
(Tel. 252/745-5111 office)

Three members of the North Carolina State University (NCSU) College of Agriculture & Life Sciences, at least one of which shall be from the area of wildlife or biology

***Dr. Clyde E. Sorenson**, Associate Professor, Dept. of Entomology, NCSU, Box 7630,
Raleigh, NC 27695-7630
(Tel. 919/515-8427 office)

***Dr. P. Sterling Southern**, Dept. Extension Leader, Dept. of Entomology, NCSU, Box 7613,
Raleigh, NC 27695-7613
(Tel. 919/515-2748 office)

***Dr. Alan C. York**, Extension Specialist & Professor, Dept. of Crop Science, NCSU, Box 7620,
Raleigh, NC 27695-7620
(Tel. 919/515-5643 office)

One member representing the North Carolina Department of Agriculture & Consumer Services (NCDA&CS);
one member representing the North Carolina Department of Environment & Natural Resources (NCDE&NR); the State Health Director or his designee

***Mr. James W. Burnette, Jr.**, Pesticide Administrator, Food & Drug Protection Div., NCDA&CS,
PO Box 27647, Raleigh, NC 27611
(Tel. 919/733-3556 office)

***Mr. Arthur Mouberry**, Chief, Groundwater Section, Div. of Water Quality, NCDE&NR,
1636 Mail Service Center, Raleigh, NC 27699-1636
(Tel. 919/715-6170 office)

***Mr. Ronald J. Howell**, Industrial Hygiene Consultant, Occupational & Environmental Epidemiology Branch,
Div. of Public Health, NC Dept. of Health & Human Services,
1912 Mail Service Center, Raleigh, NC 27699-1912
(Tel. 919/733-0502 office)

One representative of a public utility or railroad company which uses pesticides

****Mr. Joseph A. Gregory**, Economic Development Dept., Carolina Power & Light Company,
PO Box 1551, Raleigh, NC 27602
(Tel. 919/546-6449 office)

One representative of the Board of Transportation

***Mr. Don Lee**, NC Dept. of Transportation, Roadside Environmental Unit,
1557 Mail Service Center, Raleigh, NC 27699-1557
(Tel. 919/733-2520 office)

One member of the North Carolina Agricultural Aviation Association

****Mr. M. Boyd Respass**, Dreamstreet Aviation, Inc., 104 S. Dimock Road, Washington, NC 27889
(Tel. 919/975-3351 office)

One member of the general public (at large)

****Ms. Wanda P. Winslow**, 288 Kenilworth Road, Asheville, NC 28803
(Tel. 704/252-5734 home)

One member actively engaged in forest pest management

****Mr. Coleman A. Doggett**, 217 Rosecommon Way, Cary, NC 27511
(Tel. 919/467-0551 home)

One member representing the Division of Waste Management of the North Carolina Department of Environment and Natural Resources

***Mr. William R. "Bill" Hocutt**, Solid Waste Section, Div. of Solid Waste Mgmt., NCDE&NR,
401 Oberlin Road, Suite 150, Raleigh, NC 27605-1350
(Tel. 919/733-0692, ext. 260 office)

PESTICIDE ENVIRONMENTAL TRUST FUND

Throughout 2005, the North Carolina Department of Agriculture & Consumer Services (NCDA&CS) continued to fulfill the mandate of N.C. General Statutes §143-442 and §143-468 which specify the collection and disposition of environmental assessment fees that pesticide manufacturers and distributors pay when they register pesticide products for sale in North Carolina.

RECEIPTS for 2005

NCDA&CS collected \$ 452,015.00 in environmental assessment fees from the registration of approximately 12,737 pesticide brands during 2005. Fifty-six percent of the receipts were for products with reported annual North Carolina gross sales of less than \$5,000, and forty-four percent of the receipts were for products with annual sales of \$5,000 or more. (The annual environmental assessment/product is \$25 or \$50 per brand, respectively.)

BALANCES for 2005

Initial receipts from pesticide registrants paying PETF assessments are deposited into the NCDA&CS Pesticide Environment Assessment Fund (PEAF, Account No. 6136). Transfers are made from Account No. 6136 according to North Carolina G.S. § 143-468(b) as follows: 25% to agromedicine and 75% to the Pesticide Environmental Trust Fund (PETF, Account No. 6137), the account which is used by NCDA&CS to sponsor the various pesticide environmental programs summarized in this report.

As of December 31, 2005 there was a balance of \$281,590.00 in Account No. 6136 and a balance of \$108,956.77 in Account No. 6137. The total amount in both accounts as of December 31, 2005 was \$390,546.77.

EXPENDITURES FOR 2005

During 2005, NCDA&CS expended a total of \$465,682.99 from Account Nos. 6136 and 6137.

As specified in North Carolina G.S. § 143-468(b), PETF funds were distributed to North Carolina State University (NCSU), NC A&T State University and East Carolina University for operational expenses associated with administering and implementing a statewide agromedicine program; each university received 2.5% of the total PETF receipts collected during the calendar year. Twenty-percent of the total PETF receipts was used to support the agromedicine information specialist position in NCSU's Environmental & Molecular Toxicology Department. The aggregate amount of PETF funds spent on agromedicine during 2005 was \$115,644.15.

A total of \$166,300.54 was spent on pesticide container recycling and five environmental projects:

- Seven counties (Bladen, Cumberland, Halifax, Lenoir, Onslow, Pamlico, and Stanly) received a total of \$ 51,540.00 from the PETF to support local recycling of plastic pesticide containers during 2005. In addition, \$6,400.00 was spent on promotional materials for the state's pesticide container recycling program. The total amount spent on the state's pesticide container recycling program for 2005 was \$57,940.00.
- \$22,092.54 for the reprinting and distribution of the Recordkeeping Manuals – Dr. Wayne Buhler, NC State University
- \$34,410.00 for the implementation of a bar coded pesticide applicator licensing system – Certification and Licensing Unit, Pesticide Section, NCDA&CS
- \$4,800.00 for additional volunteers for the Using AFOP Trainers in Primary Health Care Facilities – Shauna Ortiz, NC Dept. of Human & Health Services' Office of Research, Demonstrations, and Rural Health Development
- Assessing Hazards of Pesticides to Native Freshwater Mussels – Dr. W. Gregory Cope, NC State University (no cost extension)
- \$2,558.00 for Managing Western Corn Rootworm Damage and Reducing Pesticide Risks in Piedmont Silage Corn – Dr. Van Duyn, NC State University
- Predicting Environmental Exposure to Pesticides in Surface Waters of North Carolina – Dr. Damian Shea, NC State University
- \$44,500.00 for Working with Christmas Tree Growers and Their Hispanic Farm Workers – Dr. Jill R. Sidebottom, NC State University

CUMULATIVE PETF FIGURES (1993-2005)

As of December 31, 2005, a total of \$4,964,024.10 in receipts has been collected since the inception of the PETF.

Since 1993, PETF has provided a total of \$1,234,674.74 for support of agromedicine in North Carolina.

Expenditures for pesticide environmental programs between 1995 and 2005 have totaled \$3,531,982.54.

Pesticide Environmental Trust Fund (PETF) Project Summaries

Agromedicine Institute: Partners for Health & Safety in Agriculture, Forestry and Fisheries

Research, education, and prevention/intervention projects are implemented to improve the health and safety of rural communities involved in these three industries. The North Carolina Agromedicine Institute (NCAI) is a collaborative effort involving East Carolina University, North Carolina State University, and North Carolina A & T State University. The North Carolina Cooperative Extension Service (NC CES) and the Eastern Area Health Education Center are outreach partners of the Institute.

The Southern Coastal Agromedicine Center (SCAC), which is one of nine regional centers funded through the National Institute for Occupational Safety and Health, is also housed at the NCAI. The SCAC covers Puerto Rico, Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi, and Florida.

The 20 projects of the NCAI and SCAC included: initiation of an Agro-Health Institute in Honduras to serve Central America and the Caribbean, establishment of an MOU between the NCAI and Batovi Instituto Orgainic- International, a research and education institute located in Tacuarembo, Uruguay, and testing of remote environmental monitors in agricultural settings.

For more information on descriptions of projects and programs that are currently underway, see the NCAI web site, www.ncagromedicine.org.

Pesticide Container Recycling

North Carolina's plastic pesticide container recycling program showed improvement during 2004 over the previous three years. USAg Recycling, Inc., the ACRC approved recycler in North Carolina, reported that an estimated 322,790 pounds of plastic pesticide containers were recycled during 2004, making North Carolina one of the leading states. These totals represent containers no larger than a 55-gallon capacity. North Carolina ranked fifth of 18 states serviced by USAg Recycling, Inc.

In the Fall of 2004, Pesticide Inspector II personnel began visiting recycling sites across the state to check on the cleanliness of pesticide containers being stored for recycling and to verify how previously awarded PETF grant money had been spent. An annual county report for 2004 was requested from all participating counties. A financial audit of all county-awarded PETF recycling grants was also conducted.

During the past year, the Pesticide Section distributed at farm shows, fairs, and other planned events a variety of items (pens, hats, rulers, golf tees, calibration cups) to promote North Carolina's recycling of plastic pesticide containers. These items were also distributed to local pesticide container recycling programs across the state.

Working with Christmas Tree Growers and Their Hispanic Farm Workers

PETF funds were awarded to train Hispanic farmworkers on Christmas tree farms in Alleghany, Ashe, and Watauga Counties in Western, NC to properly scout trees utilizing IPM concepts. Workers were contacted by project technician, Bryan Davis, prior to training dates to generate interest. Dr. Jill Sidebottom of NC State University, Forest Resources and Jim Hamilton wrote a scouting factsheet and a PowerPoint presentation teaching workers to recognize the important pests of Fraser fir and how to apply pesticides safely for control. The factsheets were translated into Spanish and 6-hour training classes were conducted in the western counties. These classes included PowerPoint presentation, factsheet, pesticide safety training, and other IPM training materials. NCDA & CS Bilingual Specialist, Carmina Hanson, aided in the training sessions.

Plans are underway for grower IPM training. This 4-hour training will include reviewing pest identification, discussing pest control strategies revolving around the scouting schedule, and spray drift reduction management.

In the fall of 2004, ground covers were sown in a demonstration site in Alleghany County to demonstrate advanced IPM techniques that will be distributed to growers in 2005.

Agriculture Worker Pesticide Exposure Research: Comparable Data Conference

Dr. Thomas Arcury, Wake Forest University, was awarded an \$8,000.00 PETF grant to establish consensus on comparable data collection, laboratory analysis and measurement for research and intervention projects focused on the pesticide exposure and environmental health of agricultural worker populations. Specifically, this conference will:

- (1) establish investigator working groups to develop consensus documents for comparable data in four areas of environmental health
 - (a) environmental exposure assessment for pesticides
 - (b) biological exposure assessment or biomarkers for pesticides
 - (c) personal and exposure characteristics
 - (d) health outcomes

- (2) convene a conference of the investigators from all of the working groups to review, discuss and refine the comparable data consensus documents in these four areas
- (3) disseminate the comparable data consensus documents in these four areas

The four investigator working groups have been established and each has produced a working group report. A conference was convened on September 30 and October 1, 2004. Twenty-four members of the working groups attended this conference. The four working groups presented their reports, and each report was discussed by those attending the conference. The investigator working groups are in the process of revising their reports based on comments and discussion from the conference.

On February 10, 2004, Dr. Arcury was granted an extension for this project through February 28, 2006.

IPM for School Buildings

Initially funded in 1998, this project ended October 31, 2002. Dr. Mike Linker presented the final project report to the North Carolina Pesticide Board on February 11, 2003. According to the project results, lack of knowledge of Integrated Pest Management (IPM) practices and lack of resources to compare the costs and effectiveness of conventional and IPM services are probably factors in the continued use of conventional pest control services by schools.

In September 2003, Dr. Linker was awarded a second PETF grant for School IPM. The following are specific project objectives:

- (1.) To raise awareness of IPM and garner administrative and institutional support for IPM programs within school systems.

Progress in 2004: On March 4, 2004, several State departments, Professional Associations and a non-profit group signed a Memorandum of Understanding (MOU) to collaborate and provide administrative support for School IPM programs within the state. A Public Service Announcement (PSA) was also developed to increase awareness of IPM and to stimulate teachers, staff and school administrators to find out more about IPM, and to request or demand its adoption by their school districts. The PSA will be distributed to radio stations across the state in Spring or Summer of 2005.

- (2.) To conduct a comprehensive education and outreach program targeting various sub-groups of the school community and other non-school groups to influence the practice of IPM in schools, and to delineate their specific roles and responsibilities and emphasize the need for community effort in a school IPM program.

Progress in 2004: Training workshops and seminars on IPM definition and implementation were conducted across the state to continue the education and awareness campaign.

- (3.) To set up IPM demonstration sites.

Progress in 2004: Demonstration sites were set up at the following locations:

- (a.) Granville Co. Schools (5 Schools)
- (b.) Guilford Co. Schools (4 Schools)
- (c.) Pitt Co. Schools (5 Schools)

These sites were selected because of chronic German cockroach pest problems.

- (4.) To develop and provide incentives that will stimulate acceptance and adoption of IPM programs in North Carolina schools.

Progress in 2004: The IPM committee decided to name the award described in the proposal as the "IPM Leader Award". Consultation with Agricultural communication of the College of Agriculture and Life Sciences to develop tools for marketing the "IPM Leader Award" are forthcoming.

- (5.) To develop an IPM Start-up Kit (on CD or Pamphlet, booklet etc.) with step-by-step instructions and information on how to implement an IPM program.

Progress in 2004: A model school IPM policy was developed in conjunction with the North Carolina School Boards Association and was made available via website and mailings. The model IPM Service Contract was reviewed and updated with Mr. Billy Tesh, a representative of the North Carolina Pest Control Association. A series of educational and informational brochures on school IPM for Teachers & Students, School Administrators, Food Service Employees and Maintenance Employees was also developed.

Managing Western Corn Rootworm Damage & Reducing Pesticide Risk in Piedmont silage Corn Production

On May 11, 2004, Dr. John Van Duyn, NC State University, was awarded a PETF grant of \$5,980.00 for a project to create a data-base showing the utility of neonicotinoid corn seed coatings and Cry3Bb biotech corn for management of western corn rootworm, and other early-season insects, in Western NC corn silage production. The database would then be used for developing extension education materials and to use experiments for current year education purposes.

Experiments were conducted in Iredell and Wilkes counties. Each test was planted in cooperation with leading growers. Data was collected on plant stands (seedling stage and harvest), insect damaged plants and silage yield.

This project is now in the outreach phase. Each test has been used for county educational tour stops. Also, an educational program, along with mini-posters has been sent to the NC CES agents in Western, NC. A four county meeting was held on February 17, 2005.

Improving Pest Control in Long Term Care Facilities

A PETF grant was awarded to Dr. Mike Waldvogel, Dept. of Entomology at NC State University, to conduct workshops to improve pest control in long term health care facilities. Workshops were held at six locations across the state with three training segments at each site. Phase I and II were directed at Nursing Home and Long-term care staff, and state/county regulatory personnel, providing an overview of IPM and general pest problems. Phase II was designed as a "virtual walkthrough" of an LTC facility, examining resident rooms, common areas, employee work areas, exterior features, and how these specific areas impact pest activity. PHASE III targeted pest management professionals whom currently serviced LTC facilities or were interested in offering such a service in their area. Phase III included discussions of issues such as resident abuse and interacting with residents at LTC facilities. Total attendance for these sessions numbered 155. Post-workshop surveys were conducted with results indicating attendees had a better understanding of IPM principles after training.

Assessing Hazards of Pesticides to Native Freshwater Mussels

On August 12, 2003, the North Carolina Pesticide Board awarded a PETF grant to Dr. Greg Cope of N.C. State University to generate toxicological information on the acute hazards of pesticides to various life stages of native freshwater mussels. The successful completion of this project will provide resource managers and other decision makers in North Carolina with valuable information that can be used to perform risk assessments for many of the pesticides currently used in the state.

Researchers tested and developed new pesticide toxicity information for eight species of mussel glochidia (larvae) and five species of juvenile mussels. During 2004, this project generated a tremendous amount of new toxicity information. This work had directly contributed toward a national effort to establish standardized testing guidelines for glochidia and juvenile freshwater mussels. The project is on schedule and expected to be completed in August 2006.

Predicting Environmental Exposure to Pesticides in Surface Waters of North Carolina

On August 12, 2003, the North Carolina Pesticide Board awarded a PETF grant to Damian Shea, Chairman of N.C. State's Department of Environmental and Molecular Toxicology. The goal of this project is to validate the use of surface water quality models to predict exposure to pesticides in North Carolina surface waters. Successful completion of this project should provide North Carolina with the tools to perform ecological risk assessments of commonly used pesticides. Project surveys of pesticide use in coastal and piedmont watersheds were completed. Surveys in potential mountain watersheds were unable to be completed due to poor response to requests for information. In addition, investigations into hydrologic conditions at candidate mountain watersheds revealed extreme variability and multiple points of entry (of pesticides) that would be very difficult to measure or model. Due to these issues in the mountain region, the project was modified from developing and testing models at one watershed in each of the three regions to developing and testing models at four watersheds, two in the coastal region and two in the piedmont. This project is expected to conclude in August 2005.

Precision Application of Reduced Volumes of Agrochemicals

In April 2002, the N.C. Pesticide Board awarded a PETF grant to Dr. Ray Long of N.C. State University in support of his field research. The ultimate goal of this study is to use digital camera technology coupled with a mechanical topper on a high clearance sprayer to create precision application of sucker control agents to the center of decapitated tobacco stalks. Most of the 2002 field season was spent in developing a lighting system (comprised of a shield, lights, and filters) that produces digital images having excellent contrast between cut stalks and leaves even under varying ambient light conditions. The next step undertaken was to use the software of a machine vision camera to identify the cut stalk automatically and output an electronic signal that will trigger a spray solenoid for application of the sucker control agent. Unfortunately, the first camera that the project purchased in 2003 did not have sufficient computing speed to process this information before the next stalk entered the visual field. A new camera, however, will soon be available which will be able to process the data much faster, even at ground speeds in excess of 5 MPH.

This project is still ongoing. Dr. Long received an extension and additional funding through December 31, 2005. Extensive field-testing was completed at the Upper Piedmont Research Station. Results from the field-testing indicate that machine vision imaging cameras have a lot of potential in agricultural settings to allow the application of small volumes of highly specific chemicals to individual plants, based on the identification of the location of the plants and perhaps plant species. In the present situation, further effort will be necessary to overcome limitations to the use of this technology.

Precise placement of agrochemicals should result in reduced chemical needs, reduced worker exposure, and reduced potential for chemical release into the environment. It is hoped that the once the application system is refined it can be adapted for applying insecticides to small plants of various species.

On-line Training for Health Care Providers on Pesticide Related Illness and Health Issues

On September 9, 2003, the N.C. Pesticide Board approved funding for development of on-line training for health care providers on the topic of pesticide related illnesses. Katherine McGinnis of the Eastern Area Health Education Center is directing the project. An instructional designer was hired to prepare content for the on-line presentation and content experts evaluated and refined course content. . The on-line program will be posted on the Internet for a minimum of two years. Participants will be able to earn Continuing Medical Education (CME) credits.

In 2004, final drafts of the modules on Introduction, Exposure, Overview of Pesticides and Toxicity and Office Preparation were completed. The module on diagnosis and treatment of acute pesticide poisoning was reviewed and is in final stages of development. Additional modules on differential diagnosis and long-term effects of pesticide exposure are in draft form.

Barring unanticipated difficulties, the course will be online and available in May of 2005 as initially projected.

Field Testing of Lethal Oviposition Traps

Dr. Charles Apperson, NC State University Dept. of Entomology presented his final report on this project, evaluating the effectiveness of the lethal oviposition trap to control the Asian tiger mosquito, at the June 8, 2004 meeting of the N.C. Pesticide Board.

A mosquito management strategy involving a lethal oviposition trap (LOVT) was evaluated under field conditions against populations of the container-inhabiting mosquito *Aedes albopictus* (Skuse). Field trials were carried out in suburban residential neighborhoods in the Cities of Raleigh and Cary, Wake County, North Carolina during the 2003 mosquito season.

Study results suggest that the LOVT had no detectable impact on *Aedes albopictus* populations. Albeit, the LOVT is an ecologically appealing management strategy, because it is based on the biology and behavior of container-inhabiting mosquitoes, the LOVT promises to be a self-sustaining method of control. It is environmentally friendly because toxicants are confined to point sources, rather than being distributed throughout the landscape.

It is recommended that further efforts be made to stabilize the toxicant in the lethal ovistrips so that the traps are active for at least 30 days. Some attempts should be made to increase the attractancy of the LOVT by modifying the trap design and/or by adding an oviposition attractant.

A Pilot Program to Integrate Pesticide Container Recycling and Pesticide Disposal

The North Carolina Department of Agriculture and Consumer Services has two very important programs that foster pesticide environmental stewardship in North Carolina. The Pesticide Disposal Assistance Program (PDAP) is a non-regulatory program that assists farmers and homeowners with proper, legal disposal of unwanted or unusable pesticides. To date, PDAP has properly disposed of over one million pounds of pesticides from collection events conducted throughout North Carolina. It is funded by appropriations from the NC General Assembly through the NCDA&CS. The Pesticide Container Recycling Program (PCRP) assists counties and local councils in establishing empty pesticide container recycling centers throughout the state. The PCRP is funded by the PETF. Since 1995, more than \$758,000 has been used to promote recycling of plastic pesticide containers in North Carolina.

Two situations in the agricultural community have been targeted that could be addressed through cooperation between the Pesticide Disposal Assistance Program and the Pesticide Container Recycling Program.

1. Improved efficiency could be obtained for the PCRP and the PDAP if a few storage facilities could be strategically located across the state. These storage facilities would serve dual purposes; participating county CES agents would be able to store both empty pesticide containers and unwanted pesticide materials. The project has purchased 3 metal cargo units for three counties (1 per county).
2. Farmers and dealers in North Carolina have many old, brittle, mini-bulk tanks that need to be removed from the farms and dealerships for recycling. This pilot project is conducting 6 mini-bulk recycling events with a pesticide Disposal Contractor on-site to properly handle the generated waste from each event.

In 2004, \$28,451.00 in Pesticide Environmental Trust Fund (PETF) money was awarded to five county programs (Ashe, Bertie, Burke, Jones, and Wayne) to support local recycling of plastic pesticide containers.

The project purchased three Metal Cargo Units, one each for Cleveland, Craven, and Washington Counties. Pesticides collected from these three storage units totaled 2,058 lbs. in 2004.

The initial processing of the mini-bulk/plastic drums began on February 9, 2004 and continued through May 2, 2004. From the mini-bulk collection sites, USAg Recycling ground a total of 41,185 lbs of plastic.

Development of Effective On-Farm Beneficial Insect Habitats for Improved Pest Management

In February 2004, Dr. David Orr, NC State University Dept. of Entomology, was awarded a PETF grant for the Development of Effective On-Farm Beneficial Insect Habitat for Improved Insect Pest Management. The three-year project will develop a list of plants that provide beneficial insect habitants. At projects end the results will recommend combinations of plants, adapted to North Carolina, that would build beneficial insect habitants and contribute to on-farm insect pest management.

The four main goals of the project are:

- (1.) Combine experience with grower's practical knowledge to select a list of agronomically acceptable, hardy plants that are adapted to the southeast, and provide habitat for beneficial insects.
- (2.) Examine purity, composition, and germination of seeds from commercial suppliers for species selected from objective This will narrow the list further to plants commercially available from quality suppliers.
- (3.) Conduct field studies to determine which of these plants are most easily grown, require the least management, are the most competitive with weeds, but will not contribute to on-farm weed problems.
- (4.) Conduct field studies to determine which plants, or combinations of plants provide the best beneficial insect habitat.

A survey of central North Carolina organic farmers was conducted in 2004 with the intent of establishing the current state of beneficial insect habitat implementation. Discussions with organic growers also contributed to understanding how organic growers are currently implementing habitat on their farms.

Pesticide Disposal Assistance Program

In 1976, the North Carolina Pesticide Board adopted regulations prohibiting the disposal of any hazardous waste, including pesticides, in sanitary landfills. The NC Pesticide Disposal Assistance Program, created by the NC Dept of Agriculture & Consumer Services, provides the public a legal, free-of-charge, environmentally acceptable mechanism to dispose of unwanted or unusable pesticides. The Pesticide Disposal Program is contained within the Food and Drug Protection Division, but is not a regulatory part of the Pesticide Section.

The Pesticide Disposal Assistance Program disposes of pesticides collected at designated single day disposal collection sites and at permanent household hazardous waste collection sites across the North Carolina. In 2005, the Pesticide Disposal Assistance Program supervised the collection and disposal of 148,361 pounds of pesticide waste. A total of 79 single day disposal events were organized by NCDA&CS during 2005. NCDA&CS also assisted 24 counties in disposal of pesticides collected at permanent household hazardous waste (HHW) sites. A participant must notify the Pesticide Disposal Assistance Program prior to taking unwanted pesticides to a HHW site.

DEFINITIONS ADOPTED

Table I lists the analytical results of formulation samples based on the following:

“PASSED” - signifies that all active ingredients were found to be present at acceptable levels based on the label guarantee.

“FAILED DUE TO DEFICIENT ACTIVE INGREDIENT” – signifies that one or more active ingredients fell significantly below the guarantee. Such products are placed under “Stop Sale Order” and are removed from the market place.

“FAILED DUE TO EXCESSIVE ACTIVE INGREDIENT” - indicates a significant excess of one or more active ingredients. Since such formulations could be harmful to the user and/or result in excessive residues, these products are placed under “Stop Sale Orders” and are removed from the market place.

Table II lists the analytical results of microbiological samples based on the following:

“PASSED” - indicates that the product was effective in killing the specific microorganisms guaranteed by the product label.

“FAILED” - indicates that the product was ineffective in killing the specific microorganisms guaranteed by the product label or that bacterial contamination of the product was found.

Table III lists manufacturers that had products placed under “Stop Sale Orders” due to the following:

“UNREGISTERED” - signifies that the product was not registered at the time it was found by a pesticide inspector in the marketplace. Any such product is required to be registered prior to release from a “Stop Sale Order.” A delinquent registration penalty is also assessed against the manufacturer.

“MISBRANDED” – indicates that the labeling of a pesticide product failed to conform to federal and/or state requirements.
